

You are an inventor of the *Aguanator 3000*. Your invention is the size of a lunchbox, runs on solar power, and converts water into gasoline as the water is pumped through the device. You are confident that your company can turn your invention into a product that will make money and be good for the environment.

Your company's policy is to fill out a disclosure form for your invention. Based on this form, the company may decide to submit a patent application or a provisional patent application. For this homework assignment, download and complete the *Invention Disclosure Form*.
