There is more to research than research!

Create a Research Poster

Pick a research topic and create research poster. The research poster must have:

- A title
- List of authors and affiliations
- An introduction paragraph.
- A summary/conclusion paragraph.
- Poster must convey research methods, results, and significance.
- Acknowledgements for funding source and other support.
- Poster size shall be 24"×36" or 36"×48". Landscape or portrait is acceptable.

Your poster will be graded according to the following criteria:

Category	Weight
Overall Aesthetics – The poster should be eye-candy to catch the attention of people walking by. Graphics must be high-quality, tell a good story about the research, and have absolutely no pixilation.	40%
Scientific Message – The scientific message should be complete, clear and compelling. The poster should convey the purpose and significance of your research, your methods, your results, and convey the meaning of your results.	30%
Content & Formatting – The poster must follow all formatting requirements and contain all information requested. Use of text should be minimum but still necessary.	20%
Special – Is anything on the poster unique or special that makes the poster more memorable or convey more information without text.	10%

While I prefer printed submission, you may submit a PDF file electronically to save cost of printing.
